# Grouping FTICR-MS data with xcms

### J. Bargsten

#### December 17, 2008

## Introduction

This document describes how to use *xcms* for aligning multiple MS spectra against each other.

# 1 Prerequisites

Lots of Preprocessing has to be done before the data is ready for aligning. First of all *xcms* and *MassSpecWavelet* are needed for further processing.

> library(xcms)
> library(MassSpecWavelet)

This documentation uses raw mzdata files from msdata as example data set. Assuming that msdata is installed, we locate the path of the package and extract the datafiles.

```
> library(msdata)
> mzdatapath <- system.file("fticr", package = "msdata")
> mzdatafiles <- list.files(mzdatapath, recursive = TRUE, full.names = TRUE)
> cat("Starting xcmsDirect.Rnw")
```

Starting xcmsDirect.Rnw

The *xcmsSet*-Constructor parses the given files and applies peakpicking using the MassSpecWavelet algorithm, leading to a **xcmsSet** object with 2 sampleclasses, ham4 and ham5, and 5 samples, respectively.

```
HAM004_641fE_14-11-07--Exp1.extracted: HAM004_641fE_14-11-07--Exp2.extracted: HAM004_641fE_14-11-07--Exp3.extracted: HAM004_641fE_14-11-07--Exp4.extracted: HAM004_641fE_14-11-07--Exp5.extracted: HAM005_641fE_14-11-07--Exp1.extracted: HAM005_641fE_14-11-07--Exp2.extracted: HAM005_641fE_14-11-07--Exp3.extracted: HAM005_641fE_14-11-07--Exp3.extracted: HAM005_641fE_14-11-07--Exp4.extracted: HAM005_641fE_14-11-07--Exp4.extracted:
```

### 2 Calibration

calibrate can be used to correct the m/z values in a xcmsSet. It needs a xcmsSet and a list of m/z value which should be found in the object. To show this on a example a sample of ham4 is created and discalibrated a bit after getting some m/z:

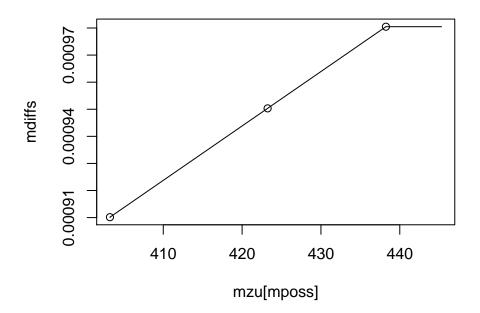

```
> xs4 <- xcmsSet(method = "MSW", files = mzdatafiles[1], scales = c(1,
+ 4, 9), nearbyPeak = T, verbose.columns = FALSE, winSize.noise = 500,
+ SNR.method = "data.mean", snthr = 10)

HAMO04_641fE_14-11-07--Exp1.extracted:
> masslist <- xs4@peaks[c(1, 4, 7), "mz"]
> xs4@peaks[, "mz"] <- xs4@peaks[, "mz"] + 1e-05 * runif(1, 0,
+ 0.4) * xs4@peaks[, "mz"] + 1e-04</pre>
```

The xcmsSet now can be calibrated again with the m/z from the masslist. The plot shows the reference masses with the distances to the found ones and the regression-line.

```
> xs4c <- calibrate(xs4, wishlist = masslist, method = "edgeshift",
+ mzabs = 1e-04, mzppm = 5, neighbours = 3, plotres = TRUE)</pre>
```

- 0.000910155
- 0.0009503368
- 0.000980482

The method "shift" adds a value to each m/z, "linear" does a regression and edgeshift does a regression but uses a shift before the smallest and after the biggest m/z from the wishlist.

These steps are necessary to create a usable input for mzClust. However, if you have already stored the data in a xcmsSet, you can skip the steps above.

# 3 Aligning

Now we can align xs with mzClust. The result is a clone of xs enhanced by the result of mzClust. For a description of the arguments mzClust takes, see helppage of the function.

> xsg <- group(xs, method = "mzClust")</pre>

1.14 6.82 17.05 21.59 27.27 31.82 37.50 38.64 42.05 47.73 53.41 54.55 63

> xsg

An "xcmsSet" object with 10 samples

Time range: -1--1 seconds (0-0 minutes)

Mass range: 400.1046-445.2931 m/z Peaks: 88 (about 9 per sample) Peak Groups: 18

Sample classes: ham4, ham5

Profile settings: method = bin step = 0.1

Memory usage: 0.0182 MB

mzClust stores the grouping information like the standard group method of xcms suited for retrieval via groups and groupidx. An example is shown below.

#### > groups(xsg)[1:10, ]

	mzmed	mzmin	mzmax	rtmed	rtmin	rtmax	npeaks	ham4	ham5
[1,]	402.2854	402.2851	402.2859	-1	-1	-1	5	0	5

<sup>&</sup>gt; peaks(xsg)[groupidx(xsg)[[1]]]

[1] 402.2851 402.2851 402.2851 402.2859 402.2859

# 4 Postprocessing

In most cases not all samples are in one group. This can be the origin of serious problems in code, which is based on e.g. *groupval*. *groupval* sets missing peaks to NA. The solution is *fillPeaks*. It changes all NA values to random noise based on the raw data file.

#### > groupval(xsg)[1, ]

### > groupval(xsg, "medret", "into")[1:10, ]
